PROFESSIONAL SUMMARY

Entry-Level Data Analyst with hands-on proficiency in SQL, Advanced Excel, and Python — querying and cleaning large datasets, maintaining dashboards that summarize key business metrics, and translating data findings into actionable business recommendations for stakeholders. Demonstrated ability to perform data validation and quality assurance, identify trends and patterns, and support business operations through ad-hoc analysis. Delivers quantified impact across every project with strong attention to detail and business acumen.

SKILLS SUMMARY

- **Languages:** SQL (CTEs, Window Functions, Joins), Python, MySQL
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Scikit-Learn
- **Analysis Methods:** Data Collection & Analysis, Data Validation & Quality Assurance, EDA, KPI Development, Trend Analysis, Reporting Automation, Cohort Analysis, Customer Segmentation, RFM Modeling, A/B Testing, Hypothesis Testing, ROI Analysis, Statistical Analysis
- **Tools & Platforms:** MS Excel (Pivot Tables, VLOOKUP, Power Query, Advanced Formulas), Tableau (LOD Expressions, Calculated Fields), Power BI (DAX), Jupyter Notebook, Git, GitHub
- **Soft Skills:** Business Acumen, Stakeholder Communication, Attention to Detail, Business Insights Presentation, Technical Documentation, Problem Solving

PROJECTS

Strategic Customer Churn Mitigation & ROI Modeling

Mar 2026

SQL, Python, Tableau, MS Excel

- Used SQL to query, clean, and analyze large datasets across 8K customers and 34K orders; performed data validation and cohort analysis to identify trends — uncovered that 33% of users drove 67% (\$2.1M) of revenue loss, a pattern invisible before structured analysis.
- Built an interactive Tableau dashboard summarizing key business metrics and proposed a \$270K intervention delivering 3.16x ROI and \$853K annual revenue recovery — translating data findings into a concrete, actionable business recommendation.

Sales Performance Analytics & Executive Dashboard

Jan 2026

SQL, MS Excel, Tableau

- Queried and integrated data from 4 siloed sources via SQL joins; created and maintained a 12-KPI Excel and Tableau dashboard to track performance indicators for leadership — surfaced underperforming regions 3 weeks earlier and reduced ad-hoc reporting requests by 40%.
- Performed distribution and correlation analysis in Advanced Excel (pivot tables, formulas) to identify seasonal demand trends, enabling proactive inventory decisions that reduced stockouts by 22%.

Business Intelligence with Advanced SQL

Nov 2025

SQL, MS Excel

- Built 25+ optimized, reusable SQL scripts to query and retrieve data for cohort retention, CLV, and ROI tracking; ensured accuracy and completeness through rigorous data quality checks — reducing time-to-insight from 3 days to under 1 hour.
- Documented comprehensive data definitions enabling non-technical business teams to self-serve reports, accelerating cross-functional decision cycles by 60%.

EDUCATION

Modern Education Society's College of Engineering, Pune, India

2023 – 2027

Bachelor of Engineering in Electronics and Telecommunication Engineering

CERTIFICATIONS

- **Data Analytics Job Simulation – Deloitte Australia** (Industry analytics workflow, business reporting, stakeholder communication) Nov 2025
- **Python for Data Science – IBM** (Python, Pandas, NumPy, data manipulation & statistical visualization) Jan 2026
- **GenAI Powered Data Analytics Simulation – TATA** (AI-assisted analysis, business problem-solving) Dec 2025
- **Intermediate Machine Learning – Kaggle** (XGBoost, Scikit-Learn Pipelines, Cross-Validation) Apr 2026
